ABOUT US

We are a fast-growing community of lifelong learners focused on developing and delivering holistic education to young leaders.

We help our community steer the dynamic and volatile world through meaningful engagements which help participants in their educational and career goals.

Our programs and products are designed for holistic education and promoting lifelong learning among young Indians.

LEARNING FOR LEADERS

CRITICAL THINKING

Ask Right Questions

Escape Default Framework

Velocity of Being

LEADERSHIP

Connect The Dots

Internalise Innovation

CHANGE MANAGEMENT

Beat Your Biases

Deal with Dilemma

STRATEGY DEVELOPMENT

Play Into Policy

Unlocking Creative Identity

ETHICS

Intellectual Integrity

Rational Morality

TEACHER TRAINING

OYI Teacher Training

One Young India's teacher training modules integrate results compiled in school through questionnaires to students and teachers, a list of select resources curated by our mentors for teachers and students to use, as well as tips for teachers on how to use these resources.

The training modules are devoted to specific multidisciplinary themes which are designed to complement the current school curricula.

Key Takeaways

Each session is designed in a way to promote life long learning and to encourage and generate lesson plans and interest on the essential world affairs. Our modules help a teacher to handle globalised information in changing educational context

EDUCATION FOR EXCELLENCE

Acquire knowledge and commit to a life of continuous education. Acquaint yourself with the realm of multidisciplinary learning and develop into a more effective learner.

Each session is designed to assist teacher in making aware and sensible choices regarding their academic backgrounds. These modules are designed to both challenge and introduce individuals to the greatest available resources for real and meaningful self-learning.

Modules

- Knowledge Economy & You
- Lifelong Learning
- Emotional Intelligence
- Research Methods
- Tackling Achievements Gaps

CRITICAL THINKING

Why Critical Thinking?

Critical thinking is an evaluated and objective way of problem solving. It requires delving into several branches of logic and reasoning. It necessitates some in-depth examination and research. Critical thinking is concerned with resolving problems rationally and using evidence-based knowledge.

Critical Thinking in Teaching

In teaching, critical thinking is vital to keep innovating and stay ahead of the game. In this 21st Century, the education sphere has seen a significant shift be it innovations or the way of studying and teaching and to cope up with these changes there must be a need to 'ask right questions' and to escape the default frame work.

ENGAGEMENT
